(54) Title: CUBE SHAPED LAMP AND PROJECTION DEVICE FOR SINGLE SLIDE OR DIGITAL PROJECTION

(57) Abstract: A lamp and projection device for a single slide or digital imaging means comprising six substantially identical faces assembled to form a cube body which supports an illumination system consisting of a light-emitting unit, a electrical transformer unit and switches, a plurality of reflecting mirrors and at least one condensing lens, and a slide or digital light engine. Said overall cube body having a hinged face at the top supporting a reflecting mirror on the inside surface which can be positioned at any angle to allow projecting an image onto a ceiling or onto an adjacent surface, with a micro-switch acting to switch on the device when opened. Said lens being adjustable by means of an external button to enable focusing. The overall faces being formed from a semi-translucent material to enable soft illumination. Said overall device being implemented as a single slide projector/decorative lamp, digital photo projector or video projector.
